## PROFESSIONAL EXPERIENCE

### Agarwal Packers and Movers Ltd

Feb 2022 - Present

#### Front-end Developer

As a Front-End Developer at APML I have had the privilege of crafting dynamic and user-friendly client dashboards. My role has extended beyond conventional web interfaces, as I successfully integrated these dashboards with a WhatsApp Bot to enhance user engagement and communication. This solution not only streamlined operations but also saved the company significant time and resources, making our workflows more efficient and productive.

#### Accomplishments:

- Optimized over 10 web pages, elevating both UI and UX to higher standards.
- Resolving client-facing issues and continuously updated websites across the entire production lifecycle, ensuring smooth operation and exceptional user experiences.
- Developed a responsive client interface with React.js, resulting in a notable 30% reduction in bounce rates, enhancing user engagement and retention.
- Implemented a WhatsApp bot that successfully reduced call volume by over 60%, streamlining communication and improving efficiency.
- Created a Client Dashboard that has garnered over 50% user adoption, effectively reducing order complaints by 10-20%, contributing to improved client satisfaction and operational efficiency.

### Agarwal Packers and Movers Ltd

Jan 2021 - Feb 2022

#### Front-End Developer Intern

As a Front-End Developer Intern, I immersed myself in the world of Angular and React.js, gaining valuable skills in these technologies. I had the opportunity to create user-friendly screens for our support teams and This experience enriched my technical knowledge and honed my web development skills, setting a strong foundation for my career in front-end development.

#### Accomplishments:

- Partnered with the 2 designer teams to take client wireframes from conception to implementation
- Implemented front-end solutions to meet the project requirement for creating of 5 new Dashboard for the support Teams
- Assisted the development team in maintaining 5 Website
- Learned front end programing to develop client website and Dashboards

## PROJECTS

### WallpaperChanger

A platform allows anyone from the internet to easily change the wallpaper on our desktop. Explore a diverse collection of stunning wallpapers and instantly see your choice transform our desktop background with just a click.

### Migraine Tracker

A migraine tracker website with Next.js and Supabase to effortlessly log and monitor migraine attacks.

### TimeLine Tracker

A timeline tracker website built with Next.js and Supabase, perfect for efficient todo management and record-keeping.

### Admin DashBoard

Built a React-based Admin Dashboard integrated with MongoDB for seamless activity tracking and efficient management of data and processes, enhancing organizational productivity and insights.

### WhatsApp Bot

Developed an e-commerce WhatsApp bot utilizing the official API, allowing users to easily view and shop for products, streamlining the shopping experience through WhatsApp messaging.

### Nutrition

Created a nutrition landing page using React that offers meal suggestions through API integration, enhancing user experience and promoting healthy choices.

### Express Builder

Built an express code generator with React, allowing users to input MongoDB URL, database, and collection names for effortless CRUD operation implementation.

### CryptoWorld

Developed a React-based cryptocurrency world platform with live price updates, offering a comprehensive view of various cryptocurrencies through API integration.
